Camera Calibration and 3D Reconstruction

- **Camera Calibration**

  Let's find how good is our camera. Is there any distortion in images taken with it? If so how to correct it?

- **Pose Estimation**

  This is a small section which will help you to create some cool 3D effects with calib module.

- **Epipolar Geometry**

  Let's understand epipolar geometry and epipolar constraint.

- **Depth Map from Stereo Images**

  Extract depth information from 2D images.
